

Muhammad Aliyu Abubakar

Software Engineer

+234 807 978 5384 · muhammadmasanawa75@gmail.com · Kaduna, Nigeria · github.com/mxg-mega · [LinkedIn](#)

PROFILE

Self-driven software engineer with a track record of shipping production-ready applications across mobile, web, and desktop. Built BizMod, a modular full-stack SaaS business management platform serving African SMEs, and ShopMate, a hyperlocal Flutter mobile commerce app. Comfortable working across the stack — from Flutter frontends to Next.js web apps and Python backends — with proficiency in AI-assisted development and version control. Seeks to build scalable, real-world products as part of a high-growth engineering team.

EXPERIENCE

Product Scientist · Tree World / DNA Labs Ltd

Dec 2024 – Present

- Built a Python/PyQt5 desktop tool (Viral Load Calculator) automating PCR-based patient viral load computation, eliminating per-patient manual calculation
- Applied systematic, evidence-based thinking in lab environments — mirroring software engineering discipline in protocol design and results validation

PROJECTS

BizMod · Next.js · Vercel · AI

2024 – Present

- Architected and solo-shipped a modular SaaS platform with 15 toggleable business systems: Inventory, POS, Sales, RBAC, Customer Management, Zakat tracking, Budget, Financial Analytics, and Smart AI-assisted data import
- Implemented multi-role configurable workflows (e.g. pharmacist invoice → cashier payment confirmation), PDF/Excel export, and an AI Zakat commentary feature
- Live at bizmod.vercel.app

ShopMate · Flutter · Dart

2024 – Present

- Building a hyperlocal mobile commerce app for Kaduna, supporting full order lifecycle across Customer, Shop Owner, Driver, and Admin roles
- Planning backend integration with BizMod to unify shop management and storefront into a single platform

GPIA — GitHub Portfolio Intelligence Agent · Python · GitHub API · AI

2025 – Present

- Building an AI agent that fetches, scans, and analyses GitHub repositories to auto-generate READMEs and CV content — Phase 4 (Batch Portfolio Scan + CV Generator) in progress

Monty Scripting Language · C

2023 – 2024

- Implemented a stack-based Python-like scripting language interpreter in C, covering opcodes, memory management, and error handling

SKILLS

Languages: Dart/Flutter · Python · C · JavaScript/TypeScript · Basic SQL

Frameworks: Flutter (Mobile) · Next.js · React · Flask

Tools: Git & GitHub · Vercel · PyQt5 · AI-assisted dev (Gemini, Devin)

Practices: RBAC · REST APIs · Modular architecture · Agile self-management

EDUCATION

BSc Biochemistry (2:2) · Kaduna State University · 2019 – 2025

TRAINING

GDSC Flutter Bootcamp — Google Developer Student Clubs, 2023

Maliyo Games Bootcamp — Game Development with Unity, 2023
